

GSE 9200 in North County

The GSE time in North County Inland started with a visit to the Gemological Institute of America. The tour included an explanation of the educational programs offered as well as the opportunity to see displays of different gems. The next morning the group provided the program at Bonsall Rotary Club and exchanged both Rotary and Rotaract banners. They also presented at Fallbrook Rotary Club at noon, with time before and after filled with vocational visits. Friday was spent at California State University at San Marcos. Dr. Janet McDaniel coordinated the day, starting with telling about seeing a live cougar (the university mascot) in a university parking lot.
